

e) $\square \square \square \square \square - \square \square \square \square \square$

Directions:

- 1. Read each sentence carefully.
- 2. Identify the type of sentence.
- 3. Write the type of sentence in the space provided.
- 4. Explain the grammatical features of the sentence.
- 5. Give an example of a sentence of the same type.

Expected Answer: Simple sentences are classified into four types: definite-personal, indefinite-personal, generalized-personal, and impersonal. Each type has unique grammatical features. Analyze each sentence for the presence or absence of a subject and the nature of the action described.

8. 8. Read the following sentences and identify their types.

Directions:

1. Write the type of sentence.

2. Explain the grammatical features.

3. Give an example of a sentence of the same type.

4. Write the type of sentence in the space provided.

Directions:

- 1. Read each sentence carefully and identify its type.
- 2. Explain the grammatical features of the sentence.
- 3. Give an example of a sentence of the same type.
- 4. Write the type of sentence in the space provided.
- 5. Explain the grammatical features of the sentence.

Expected Answer: Complex sentences are categorized into four main types based on the ways clauses are connected: compound, complex, compound-complex, and those with various connections. Identify the type of connection between clauses in each sentence to determine its type.
